2. Research Methodology & Investigative Approach

Objective: best electric SUVs released in 2026

The research crew issued live web-search queries for the objective and registered 7 evidence items into a shared Evidence Ledger, each tagged with a citation id ([E1], [E2], ...), source title, canonical URL, and confidence score. A Groq LLM (model: groq/llama-3.3-70b-versatile) then generated the analytical content — statistical benchmarks, key themes, executive synthesis, strategic implications, recommendations, and limitations — grounded strictly in that evidence. Quantitative metrics were extracted from the source snippets where available; where the evidence lacked hard numbers, the LLM synthesized qualitative comparative metrics derived from the findings. All claims in this brief trace to a registered evidence citation.
